Founder Vice Chancellor : Prof. Dr. Jai Rup Singh
Registrar : Col. (Rtd.) Jagdev Kartar Singh

The Central University of Punjab, Bathinda (Punjab) has been established through the Central Universities Act 2009 which received the assent of the President of India on 20th March 2009. Its territorial jurisdiction extends to the whole State of Punjab. This newly set up Central University of Punjab (CUP) at Bathinda is poised to write new alphabet on the academic horizon of India. This University is one of the important links in the recently set up chain of Central Universities created in the educationally backward areas of India. Going to be an upwardly mobile organization, it is destined to emerge as a quality provider of teaching and research, knowledge and skills, products and services, attitudes and ethics. It is gearing up to provide proper institutional leadership to the emerging demands of access, equity, relevance and quality in the mainstream University system. It has already flexed its muscles and initiated its first academic session. The University also aims to sponsor time-bound and goal-oriented research and development projects of various types for users like industries, companies and other agencies in India and abroad. The Central University of Punjab, Bathinda, is going to be an ultra-modern and futuristic seat of higher learning by creating a community of teachers, scholars and researchers dedicatedly absorbed in academic exploration, research and development, testing and consultancy. It will have world class infrastructure which would be eco-friendly, and optimally used, with the potential to absorb even yet to emerge technologies. It is striving to be an autonomous and hassle-free space where the creative minds would converge and construct world class knowledge and vision, and where new ideas would germinate, strike roots and grow wings. The University is creating supporting and stimulating conditions and opportunities whereby one can learn, grow, interact and discover. It would be an exciting, safe, healthy, motivated and happening place with a green energy efficient, Wi-Fi campus, innovative and ignited faculty, global level laboratories, automated libraries, vast playgrounds, auditoria, research centres and other world class support systems. The University would introduce participatory delivery techniques facilitated through seminars, group discussions, off campus visits, online support, web, multimedia, live projects, field studies, demos, team presentations, skill workshops, etc.

The University would carve out and maintain its national character and global outreach through its instructional and research programmes. It is planned to be a multi-facility and multi-faculty university enshrining state-of-the-art infrastructural support systems for teaching and research. It will bring into public domain the global technological trends for the benefit of every strata of society. It started its functioning from Camp Office in April, 2009, which happens to be the residence of the Vice Chancellor, and from November 2009 it shifted to its City Campus spread over an area of 35 acres. The main campus is coming up on 500 acres of land near Bathinda.
