The AISECT University, Jharkhand is a premium University that maintains a unique pedagogy and innovative teaching methodology. Bhopal-based AISECT Group, which is India's first Skills University where skill development programmes are a compulsory part of the course curriculum, has set up AISECT University, Jharkhand at Matwani in Hazaribagh district of Jharkhand. As the first skills-based University of the state as well as the first private University of the district, it will endeavor to impart world-class skills-based formal higher education to students of Jharkhand. This will be the second campus of AISECT University in the country. At present, the proposed curriculum of AISECT University Hazaribagh comprises of Undergraduate and Post Graduate programmes under six Faculties including Management, Commerce, Computer Science & IT, Agriculture, Art and Vocational Educational. The University will also offer M. Phil. and Ph.D. courses in the years to come. AISECT University was launched in 2012 in Bhopal by AISECT, which is India's leading Social Enterprise working in the areas of Skill Development, Higher Education, Financial Inclusion and other ICT based services. It is the first University in India to introduce compulsory skill courses at the UG & PG levels. In addition to the normal curriculum, the University has made one skill compulsory every year for each student during any degree course. Therefore an Undergraduate student passes out from the University with minimum 3 to 4 skills in addition to hands-on experience on industrial machines in labs. The University has also started eight Multi Skill Academies in collaboration with the National Skill Development Corporation (NSDC) to provide over 30 skill courses. Furthermore, it has collaborated with various industries nationally as well as internationally like Microsoft, Tata Motors, Reliance, BSNL, IT Power, etc. to jointly set up skill centres, research labs etc., thereby creating a vibrant platform for the development of the students. "In the present era, there is a need for educational programmes which focus exclusively on skill enhancement thereby giving a boost to the practical efficiencies of the youth. We, at AISECT University, aim at making our students competent and professional. We believe in their holistic development of the students and that's why our goal is not only to provide them standardized education and training, but also to enhance students' skill-set so that they are ready to face the hurdles of the professional world as soon as they step out of the University.

We have successfully executed this at our campus in Bhopal and plan to continue this legacy at the new campus in Hazaribagh as well," said Mr. Santosh Kumar Choubey, Chancellor, AISECT University.
