Plastics – One of the fastest growing industries in India, plays a vital role in Indian economy. The next two decades will witness an unprecedented, explosive growth in all sectors of Plastics Industry that demands clear, long term constructive goals and a time bound action program. PLASTINDIA FOUNDATION is the Apex body of major Associations, Organizations, and Institutions connected with Plastics, with an objective to promote the development of Plastics Industry and to assist the growth of Plastics, its related materials and their products. The foundation is dedicated to national progress through Plastics. Plastindia is an internationally recognized organization, devoted to promoting excellence in the field of Plastics with an aim to make India, a preferred global sourcing base. It supports & encourages development of outstanding institutions, committed to education & research with emphasis on achieving the highest standards of quality in Plastics products & developing effective techniques for their recycling. It will build an awareness about the significant contribution made by Plastics to the society & the environment. Plastindia Foundation has taken an initiative to launch Plastindia International University recognizing the need for human capital in future. The vision of Plastindia International University is to provide world- class education and produce well groomed, well trained, culturally sensitive human resource to Plastics and allied industries by integrating technology and management courses. The emphasis is to provide an integrated campus, dedicated to study of Plastics Technology with state-of-the-art technology and educational infrastructure.

Mission

- To establish a unique platform for learning by making available, renowned academicians and trained faculty, thereby ensuring ideal teaching and learning model.
- To promote excellence across the full spectrum of research activity in Plastindia International University.
- To achieve an on-going discourse that attempts to capture all the considerations involved in assuring that stakeholder interests are addressed and reflected in policy initiatives.
- Promote process design, testing and innovation in Plastics Technology.
- To conduct continuing education programs that ensure, industry is updated on latest technology and production practices.
- To associate with International Universities and confirm that our academics and infrastructure meet international standards.
