Indian Institutes of Science Education and Research (IISERs) were created in 2006 through a proclamation of Ministry of Human Resource Development, Government of India, to promote quality education and research in basic sciences. Soon after the announcement, two of these Institutes at Pune and Kolkata, respectively, were started in 2006. This was followed by an Institute at Mohali (2007) and at Bhopal and Trivandrum in 2008. Each IISER is a degree granting autonomous institution with a prime focus to integrate science education and research, with a motive of attracting bright students and world class faculty. Indian Institute of Science Education and Research Bhopal will provide a platform for the faculty to engage in high quality pedagogy, at both undergraduate and postgraduate levels, and to perform cutting edge research in frontier areas of basic sciences. The Institute is also committed to impart high moral and ethical values to students and create a genuine concern for social and environmental issues. With these set of broad objectives, it is believed that IISER Bhopal will emerge as a world-class Institute within a few years of its inception. IISER Bhopal offer BS-MS (Dual Degree) programme, Integrated Ph.D. programme in Chemistry, Mathematics and Physics and Ph.D. programme in Biological Sciences, Chemistry, Earth and Environmental Sciences, Mathematics and Physics. The details of these programs can be found under academic affairs.

## Vision

- "To emerge as an Institute of the highest calibre in which teaching and education will be totally integrated with the state of the art research."

## Mission

- Promote research and development activities in science and application of scientific methods by investing in infrastructure and faculty, promoting academic reforms and spreading scientific awareness among public.
- Provide pivotal training in natural sciences and liberal arts enabling the young minds to develop not only rationale but creative thinking capabilities as well.
- Foster an environment of liberal education of natural sciences with a spirit of freedom of thought.
- To collaborate and develop strategic alliances in order to tread new and innovative vistas for long-term dialogue between academia and industry.
- To nurture a scientific temper in the society so as to eliminate the illogical dogmas and irrational thoughts.
- Create a cadre of scientists of high calibre imparting training in the latest techniques of scientific experimentation in order to carry out research at the cutting-edge areas of science.
